

schall und stille

biike

friends

hiding away
the treasures we found in a cave
of pirates long lost to the waves
our lives like a tale

we'd always stay
together come rain or come shine
solving those riddles and crimes
we'd never fail

shadows that pass in the night
a distant flickering flame
dragons were taking flight
with voices that whispered your name
a new adventure awaits
at the break of another day
with friends right there by your side
to walk with you all of the way

and now you got things on your mind
you feel you just don't have the time
and so you choose not to reply

and silence just cuts like a knife
chipping away at the dream
i wonder what keeps it alive

shadows that pass in the night...

(i know what it's like)
time keeps moving on
(as we try to live our lives)

the sun rises up in the sky
paints the shore in a golden light
the journey ahead may be long
together you'll make it right

flames

see the flames
see the wind
see the waves
washing it all away
see the flames
burning it all away

the fools and the liars
the sorry deniers
they made you feel sad
they made you lose whatever faith you still had

see the flames
burning it all away
see the winds
blowing it all away
see the waves
washing it all away
see the flames
burning it all away

senses are numbing
while your mind keeps on running
trying to find a way out
from this vicious cycle of doubt

see the flames
burning it all away
see the winds
blowing it all away
see the waves
washing it all away
see the flames
burning it all away
